goods for  
onward shipping

## Our Packing Services

### Specialist Export Packing

It's our job to identify and eliminate any unexpected difficulties to ensure your goods are protected for exporting and transporting.

From wooden crates and heat shrunk pallets, to corrugated cardboard, polyethene lined cases and hermetically sealed foil bags, we design and choose the packing materials to suit the requirement. Our team of specialists can provide a combination of bespoke packing and shipping solutions for heavyweight and out of gauge machinery.

### Bespoke Cases, Crates And Pallets

We work with you to create a bespoke packing solution that ensures your products are packed safely and the overall size of the shipment is kept to a minimum, helping you reduce your logistics spends. We can deliver the ready-made case, crate or pallet to your premises for any size product.

If you have limited storage space, we provide flat pack kits which are easy to assemble. Alternatively, we can work on call off orders to suit your requirements over a period of time.

### Packing On Your Premises

Our packing team can attend your premises or a designated site of your choice for packing prior to moving your goods. We'll visit your site to measure up, and submit a packing specification based on our recommendations.

We tailor our packing style to both its end destination and customer specification and can give expert advice and guidance on all projects.
