

ENVIRONMENTAL POLICY STATEMENT

CCL is a Managed 4PL, with a full range of Logistics Services and Technology Solutions that combine to help customers reduce costs and grow, sustainably. CCL recognises the importance of environmental protection and is firmly committed to operating its business responsibly, in fulfilment of its compliance regulations and showing the greatest respect for the environment and committing to combating climate change.

Although CCL does not run its own fleet of vehicles, the nature of our industry involves constant use of vehicles such as vans, lorry's, ships, trains and planes, all of which invoke concerns over emissions, energy usage and threat to the environment due to their CO2 emissions.

We at CCL acknowledge these concerns and the need to find solutions to reduce them. We also recognise that other day to day activities within our company may impact on the environment, and we aim to minimize the potentially harmful effects of these wherever possible. We will also carry out measures reasonably practicable to meet, exceed or develop all necessary or desirable requirements to protect the environment and continually improve our Environmental Management System.

At CCL we will:

- Calculate our CO2e emissions and publish annually via CDP, SEDEX and SBTi
- Reduce our CO2e emissions via our SBTi approved target to "reduce scope 1 and scope 2 GHG emissions 42% by 2030 from a 2022 base year, and to measure and reduce its scope 3 emissions"
- Work towards Net Zero by 2045, as per Scottish Government commitment at COP 26
- Continually assess the environmental impact of our operations and minimise where possible the use of materials and resources and to prevent pollution
- Promote our commitment to ISO 14001 to our people, our customers and our suppliers through our website and customer engagement at industry events
- Give consideration to the effect on the environment of all materials we source and dispose of them in accordance with the waste hierarchy –
Prevention > Preparing for reuse > Recycling > Other Recovery > Disposal
- Encourage our people to be involved in environmental issues, and promote environmental awareness through learning and provision of information
- Give consideration to environmental issues when implementing new products and procedures within our company

All of our people at CCL demonstrate commitment with respect to the Environmental Management System, taking accountability for its effectiveness, ensuring that Policy and Objectives are established and met, communicating its importance to their staff, promoting continual improvement, ensuring resources are available and ensuring the integration of the Environmental Management System into CCLs business practices.

This Policy is communicated to all employees, suppliers and sub-contractors and is made available to interested parties.
